Hubungan Pengetahuan Dan Pola Asuh Terhadap Kejadian *Sibling Rivalry* di Kecamatan Rambang Niru Muara Enim Tahun 2024

(viii + 56 Halaman + 7 Tabel + 2 Bagan, 7 Lampiran)

Sibling rivalry merupakan salah satu permasalahan yang terjadi dalam keluarga, yaitu persaingan yang terjadi pada hubungan kakak dan adik. Dampak lain dari *sibling rivalry* juga dapat menyebabkan gangguan mental emosional merupakan suatu kondisi dimana anak mengalami kesulitan dalam mengungkapkan emosinya. Pengetahuan ibu sangat penting dalam menghadapi masalah pada anak selain itu pola asuh yang diterapkan oleh orang tua di rumah itulah yang dapat mempengaruhi kecenderungan seorang anak untuk bersaing dengan saudara kandungnya

Penelitian ini bertujuan untuk mengetahui hubungan pengetahuan dan pola asuh terhadap kejadian *sibling rivalry*. Desain penelitian *cross sectional*. Penelitian dilaksanakan di Kecamatan Rambang Niru Muara Enim, tempat penelitian dilaksanakan di Posyandu Desa Air Enau, Posyandu Desa Gemawang, Posyandu Desa Manunggal Jaya pada tanggal 30 Juni s.d 30 Juli 2024. Sampel penelitian berjumlah 44 responden. Teknik sampling *purposive sampling*. Instrumen yang digunakan dalam penelitian adalah kuisioner. Uji statistik yang digunakan uji *chi-square*.

Hasil penelitian diperoleh sebagian responden memiliki pengetahuan baik tentang *sibling rivalry* sebanyak 31 responden (70,5%), sebagian besar responden menerapkan pola asuh *Demokratif* sebanyak 31 responden (70,5%) dan sebagian besar responden memiliki anak usia prasekolah dan menyatakan anaknya tidak mengalami *sibling rivalry* sebanyak 30 responden (68,2%) dari 44 responden. Ada hubungan pengetahuan dengan kejadian *sibling rivalry* di Kecamatan Rambang Niru Muara Enim Tahun 2024, hasil uji statistik menggunakan uji *chi-square* diperoleh *p-value* = 0,000. Ada hubungan pola asuh dengan kejadian *sibling rivalry* di Kecamatan Rambang Niru Muara Enim Tahun 2024, hasil uji statistik menggunakan uji *chi-square* diperoleh *p-value* = 0,000.

Diharapkan petugas kesehatan lebih meningkatkan perannya dalam memberikan edukasi kesehatan pada orang tua dan pasangan calon orang tua mengenai *sibling rivalry* di Kecamatan Rambang Niru Muara Enim.

The Relationship between Knowledge Level and Parenting Patterns on Sibling Rivalry Posyandu Incidents in Rambang Niru Muara Enim District in 2024
(viii + 56 Pages + 7 Tables + 2 Charts, 7 Attachments)

Sibling rivalry is one of the problems in families, namely competition that occurs in the relationship between brothers and sisters. Another impact of sibling rivalry can also cause emotional mental disorders, a condition where children have difficulty expressing their emotions. Mothers' knowledge is very important in dealing with children's problems. Apart from that, the parenting style applied by parents at home can influence a child's tendency to compete with his siblings.

This research aims to determine the relationship between knowledge and parenting patterns on the incidence of sibling rivalry. Cross-sectional research design. The research was carried out in Rambang Niru Muara Enim District, where the research was carried out at the Air Enau Village Posyandu, Gemawang Village Posyandu, Manunggal Jaya Village Posyandu on June 30 to July 30, 2024. The research sample consisted of 44 respondents. Purposive sampling technique. The instrument used in the research was a questionnaire. The statistical test used was the chi-square test.

The research findings indicate that a majority of respondents have good knowledge about sibling rivalry, with 31 respondents (70.5%) demonstrating this knowledge. Most respondents apply a democratic parenting style, also with 31 respondents (70.5%). Additionally, a significant portion of respondents have preschool-aged children and reported that their children do not experience sibling rivalry, with 30 respondents (68.2%) from 44 responden. There is a significant relationship between knowledge and the occurrence of sibling rivalry in Rambang Niru District, Muara Enim in 2024, with a chi-square test yielding a p-value of 0.000. Similarly, there is a significant relationship between parenting style and the occurrence of sibling rivalry in the same district, with the chi-square test also yielding a p-value of 0.000..

It is hoped that health workers will further increase their role in providing health education to parents and prospective parents regarding sibling rivalry in Rambang Niru Muara Enim District.
